

Students and Physicians alike now have the opportunity to connect, chat, and engage in mentorship within the app.

FOR STUDENTS

Students now have access to a directory of willing physicians whom they can engage in mentorship. With the ability to learn about potential mentors' specialties and education, finding the right fit for interests and growth is easy. A student is able to have up to three mentors at a time, chatting and discussing with them in real-time within the app.

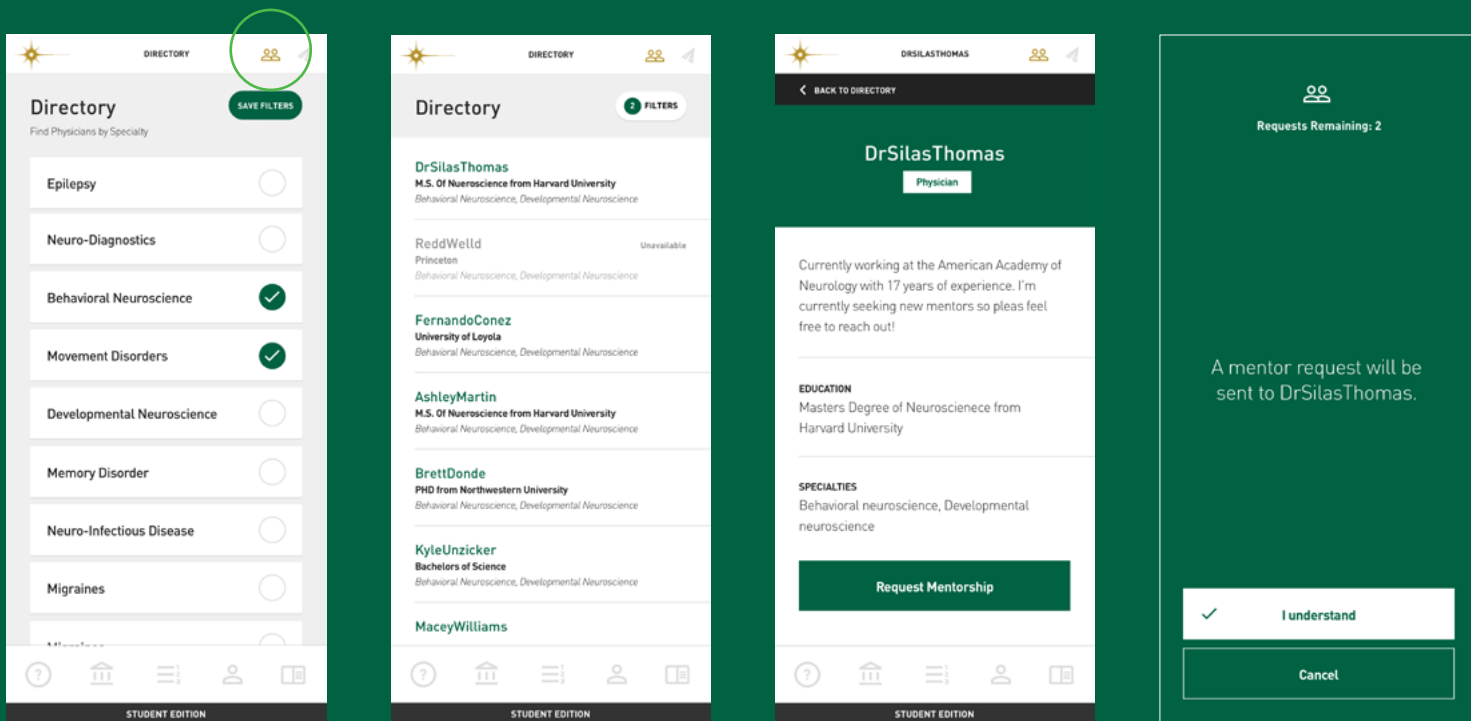

FOR PHYSICIANS

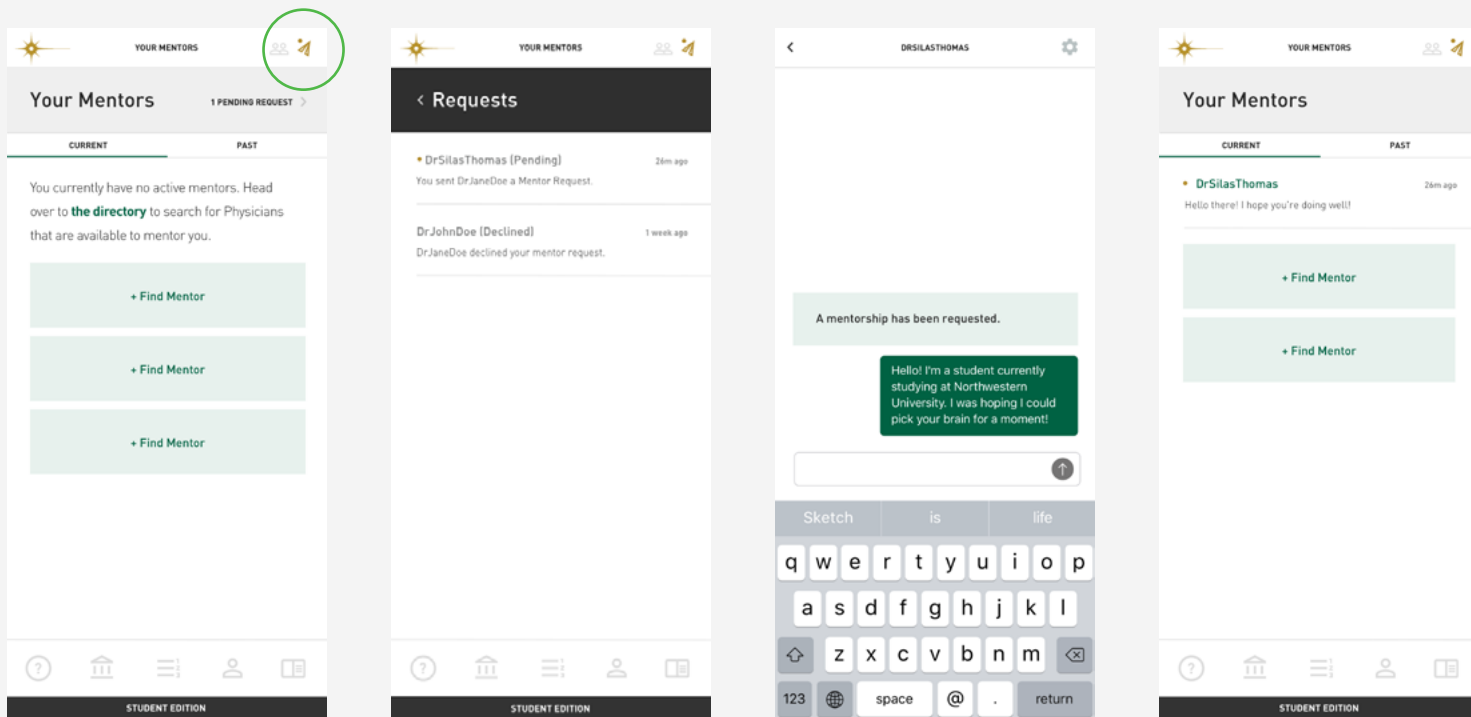

Physicians can now opt-in on their profile to be able to connect via chat, take part in one-on-one conversations, and approve potential mentees within the app providing an easy and safe place to share knowledge and help mentees grow. It's easy to manage relationships within the application with simple controls that let mentors approve mentorships, remove and complete them, as well as allow for keeping in touch with any of your past mentees.

FOR STUDENTS

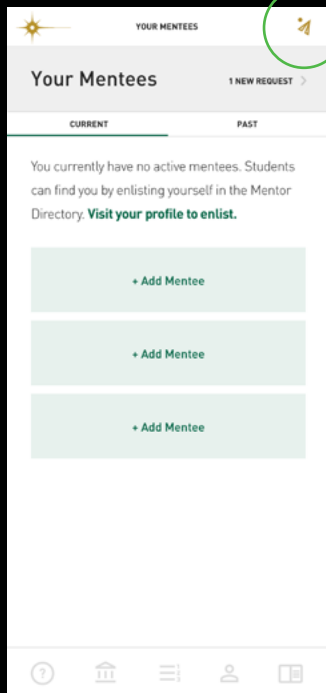

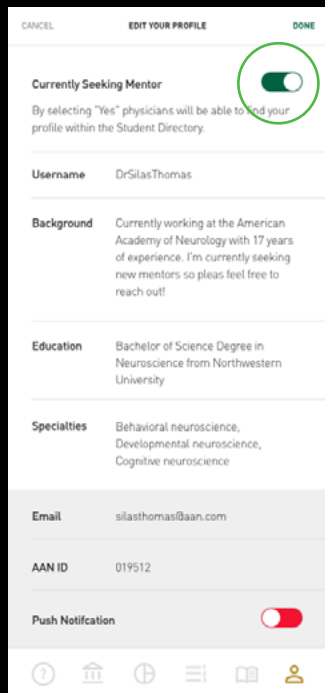

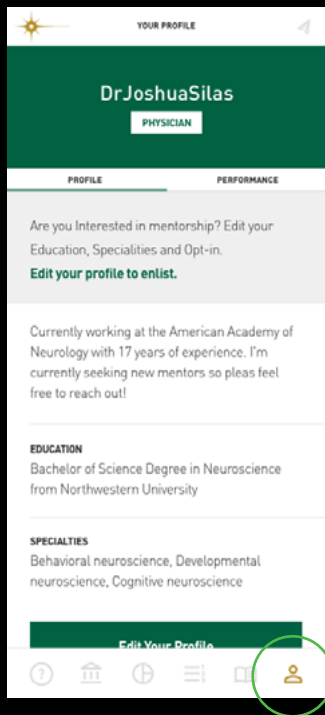

Students can visit the new Physician Directory to find potential mentors based on specialty, reach out, and begin a mentorship dialogue.

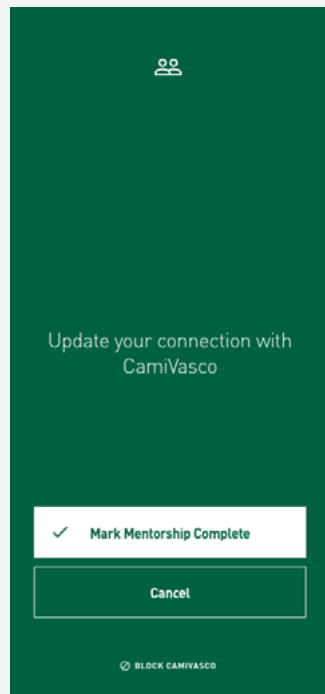

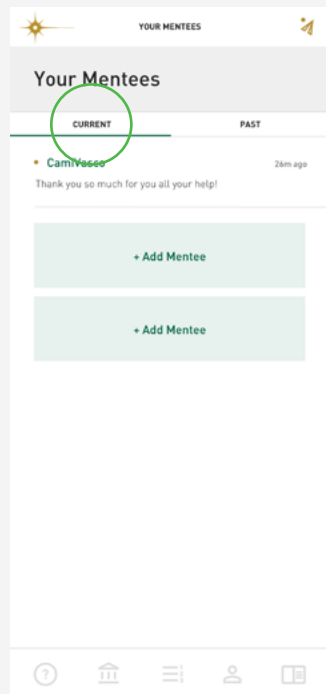

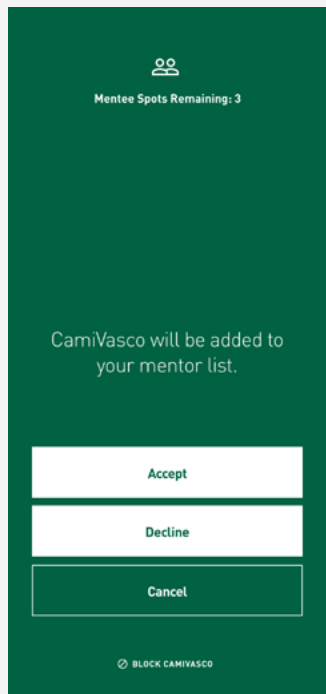

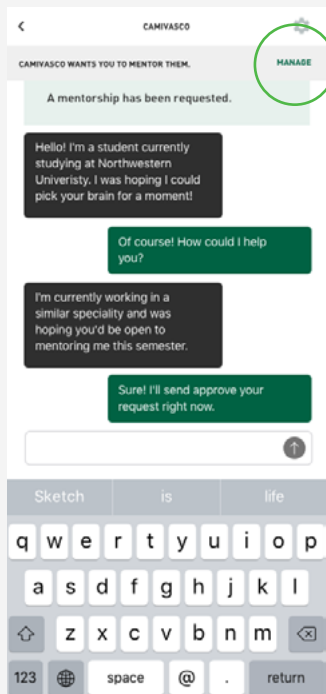

Students can have up to three mentors at a time. You can find this by accessing your Mentor Message section. You can see the status of your requests, and chat with mentors.

FOR PHYSICIANS

You can now opt in through your profile to become visible to potential mentees who can reach out to you to become one of your three possible mentees.

You'll be able to chat with potential mentees, add them to your approved list, and when your mentorship is complete, you can move them to your past list so you can keep in touch with them long after your mentorship has completed.
